

LOCATE & OPERATE

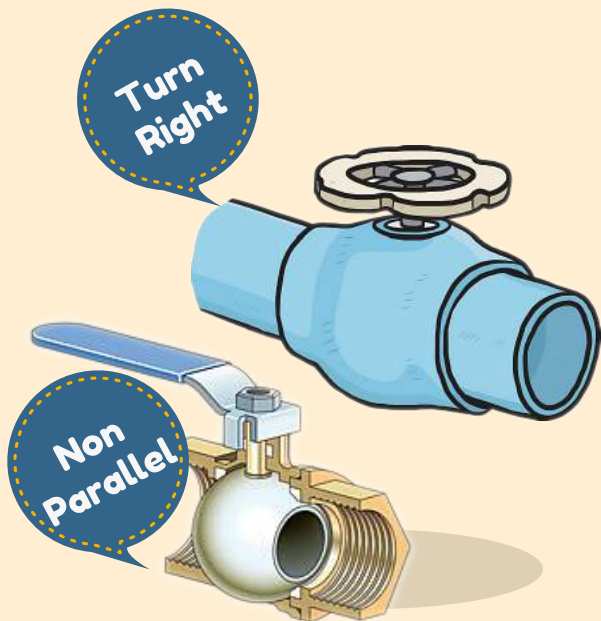

Main Water Shut-Off Valve

How to Turn Off House Water

1. Find the Valve

This valve is usually in the basement or on an outside wall in a utility area of the house.

Could be found near the water meter outside, near the curb, near the water heater or under kitchen sink.

2. Shut-Off/Turn-Off

Once located, you will need to hand-operate the shut-off-valve. Be cautious, as there could be spiders and other insects nearby.

Round 'wheel' handle valves take 2 or more revolutions clockwise (right).

Level handle valves take 1/4 turn, until the handle is not parallel with the pipe.

3. Call Titan

Titan Restoration of AZ can quickly come out to your premise and mitigate water floods to minimize damage. We are the #1 water damage Phoenix solution working 24 hours.

24/7 Services

All of the emergency service jobs will be handled strictly by Titan Restoration of Arizona's trained and certified technicians.
